**LAB & MEDICAL CENTER**  
(Gulshan-e-Ravi)

**Assistant Professor**  
**Dr. Mahwash Shoaib**  
Consultant Radiologist  
MBBS, FCPS(Radiology)

Name: Abdul Rehman Date: 18-7-23 Age: 23y Sex: M

**ULTRASOUND ABDOMEN (indoor)**

Rx

**LIVER:** measures 15.5 cm and shows mildly reduced parenchymal echo texture with smooth margins. No definite focal lesion. No intra or extra hepatic biliary channel dilatation.

**PORTAL VEIN:** measuring 9 mm is patent.

**GALL BLADDER:** is partially contracted showing diffuse wall thickening and oedema (9 mm). No hyperechoic gall stones.

**SPLEEN:** is bulky measuring 10.5 x 6.0 cm.

**PANCREAS:** shows normal parenchyma. No focal lesion.

**KIDNEYS:** both kidneys are normal in size showing normal parenchymal and sinus echoes with preserved cortico-medullary differentiation. No stone, mass, cyst or hydronephrosis on either side.

**Urinary bladder** is empty.

**Mild pelvic free fluid** is appreciable.

No significant lymphadenopathy.

Prostate is normal.

**IMPRESSION:**

Findings are concerning for acute viral inflammatory process. Clinical and lab correlation for dengue etiology advised.
